Bureau of Safety and Environmental Enforcement Well Activity Reports · data as of: 2025-08-03 (latest recorded completion activity in the reference workbook; acquisition cut-off not recorded)

Drilling and completion durations

Drilling and completion duration distributions are compared by lease group, distinguishing zero recorded spans from non-zero durations. The twelve lease-name groups include separate Cascade and Chinook and Jack and St. Malo groups. Kaskida and Tiber are recorded as pre-final-investment-decision; North Platte is recorded as non-producing.
