Transportation Safety Board of Canada; Data Liberation Project historical accident collection; International Maritime Organization Global Integrated Shipping Information System; Bureau of Safety and Environmental Enforcement incident records · data as of: not recorded

Offshore and marine incident assessment

Marine casualty and offshore incident records support cause analysis and engineering screening. Source populations and missing information limit comparisons.

WHAT YOU GET

- Fatality, foundering and hatch-incident distributions
- Casualty severity, vessel-type and flag-state comparisons
- Mooring fatigue screening with illustrative loading and recorded failure context
