
live parameter sliders

Interactive playbook

Move water depth, reserves and tieback distance and watch the recommended development concept and its schematic update live.

WHAT YOU GET

- Instant concept recommendation from field parameters
- To-scale schematic regenerates as you move the sliders

Ask Deckhand: “Recommend a development concept for a field at 1500 m water depth, 200 MMbbl recoverable, 30 km tieback.” — send to [@the_deckhand_bot](#) to run it live.
