BSEE OGOR-A · life-to-date, public data

Field economics & benchmarking

Per-well, per-block and per-field NPV (@10%) and breakeven WTI for the seven Lower-Tertiary deepwater fields, computed from public BSEE production filings — life-to-date, not full-cycle — and regression-guarded by a CI test on every change.

WHAT YOU GET

- Life-to-date cashflow, NPV timeline and breakeven per field
- Price sensitivity (dNPV/dWTI), reproducible to the cent
- Portfolio roll-up plus cross-field well benchmarking (2010–latest)
