BSEE · USCG · TSB · IMO GISIS · MAIB

Offshore safety & HSE

Public marine-casualty and offshore-incident data, normalized and analysed deterministically — incident classification, cause-event breakdowns, and engineering screens anchored to real failures.

102,618
incident records

7,349
fatalities analysed

13,338
IMO casualties

WHAT YOU GET

- Cross-database fatality / foundering / hatch breakdowns
- IMO GISIS casualties by severity, vessel type and flag state (1900–2025)
- Mooring-fatigue screening anchored to real BSEE failure incidents
