source-traceable · CI-guarded

Verified figures & provenance

Every published number traces to a public regulatory filing; the economics are regression-guarded by CI so a result can never silently drift from the method it claims.

public source	regression-guarded	source-traceable

WHAT YOU GET

- Every figure labelled with its source and any data limits
- Deterministic, stdlib-only static build — identical for everyone, every time
- Where data is incomplete, each page says so rather than guessing
