Bureau of Safety and Environmental Enforcement Oil and Gas Operations Reports; United States Energy Information Administration oil prices · data as of: 2025-05 · pre-tax basis · Price: historical West Texas Intermediate monthly prices; cost: recorded drilling, completion, facilities and operating assumptions

Field economics and production comparison

Life-to-date field, block and well cashflow for the selected deepwater Gulf of Mexico developments. The comparison covers recorded production and costs estimated from the stated assumptions, rather than a full-cycle forecast.

7

developments recorded as producing in the reference population

WHAT YOU GET

- Net present value at a 10% annual discount rate and field cashflow timelines
- Oil-price sensitivity and field breakeven comparisons
- Well and block contributions, with shared costs allocated by production share
