SubseaIQ commercial offshore-field catalogue; Bureau of Safety and Environmental Enforcement asset records · data as of: 2014 (approximate catalogue baseline; acquisition cut-off not recorded) · pre-tax basis · Price: supplied field oil-price inputs; cost: development-system assumptions and qualitative concept adjustments

Offshore development concept comparison

Early concept comparison from field parameters, with subsea arrangements and indicative economics. This is a concept-stage assessment rather than a detailed development design.

333
Gulf of Mexico fields in the catalogue

115
fields matched to regulator lease blocks

WHAT YOU GET

- Development concept screening from depth, reserves and tieback distance
- Subsea arrangements and equipment geometry
- Comparison with recorded development concepts where matched
