Status, dates & per-lease detail pending the [BSEE lease ingest \(#959\)](#).

Provenance: Primary facts (operator, working interests, capex \$5.6B, plateau 75 mbopd, GOR 1100 scf/bbl, opex \$15/boe, first oil 2024-08, data through 2024-12-31) from in-repo anchor.yml. Life-cycle dates corroborated by public sources: discovery well Anchor-2 drilled 2014 (Green Canyon 807, ~5,180 ft), FID December 2019 (~\$5.7B sanction), first oil August 2024 — world's first 20,000-psi HPHT deepwater development on a semisubmersible FPU, Lower Tertiary Wilcox play. Working interests (Chevron 62.5% / Equinor 25% / TotalEnergies 12.5%) per YAML; note older Offshore Technology page still lists pre-Equinor split (Chevron 62.86% / Total 37.14%). water depth ~5,180 (block-level estimate). projected end-of-production and lease year not confidently sourced; no notable incident.
